Introduction

This document will present the results of my testing project on the goldaglida.co.il webpage. The purpose of this report is to showcase my findings on a real website, and to demonstrate my abilities in the QA field.

It should be stated that this is a QA course project, meaning I am not employed by Golda to do this, and did not have access to any SRS documents or other benefits of testing within the company.

The testing process included writing a detailed STD and following it, with some experimental testing to complement. When executing tests, bugs were reported using Jira. The test process included functional and non-functional tests and the results reflect that.

For Employers

The underlying goal of this report is to showcase potential employers that I can contribute to any QA team. In this report you will see my ability to detect bugs in an actual website and my ability to report my findings in an intelligent and useful manner.

Webpage Overview

Golda's webpage has multiple functions, but the main ones seem to be furthering Golda's brand image, allowing customers easy access to each store's information and delivery method, and facilitating communication with potential contractors, future employees, and event planners.

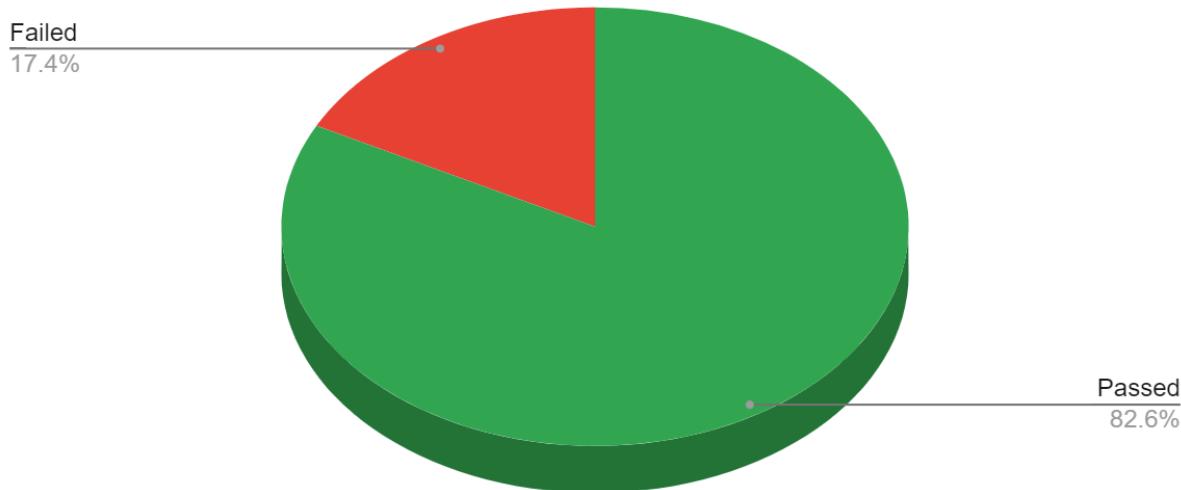

To those ends, it is important that access to the stores' information will be smooth and easy, and that contacting the company will be functional. Additionally, since the website looks slick and seems to be designed to contribute to Golda's brand image, visual bugs should also be taken more seriously within this testing process.

As a final reminder, this project was written as an outsider to the company and without access to an SRS, therefore I am making assumptions about the website's goals and how specific features are intended to work. I do believe however I've made reasonable assumptions regarding the above within the project.

Metrics

With 17% failed tests out of test run, these results indicate the Golda website still includes numerous bugs and further testing will be helpful.

Test Results

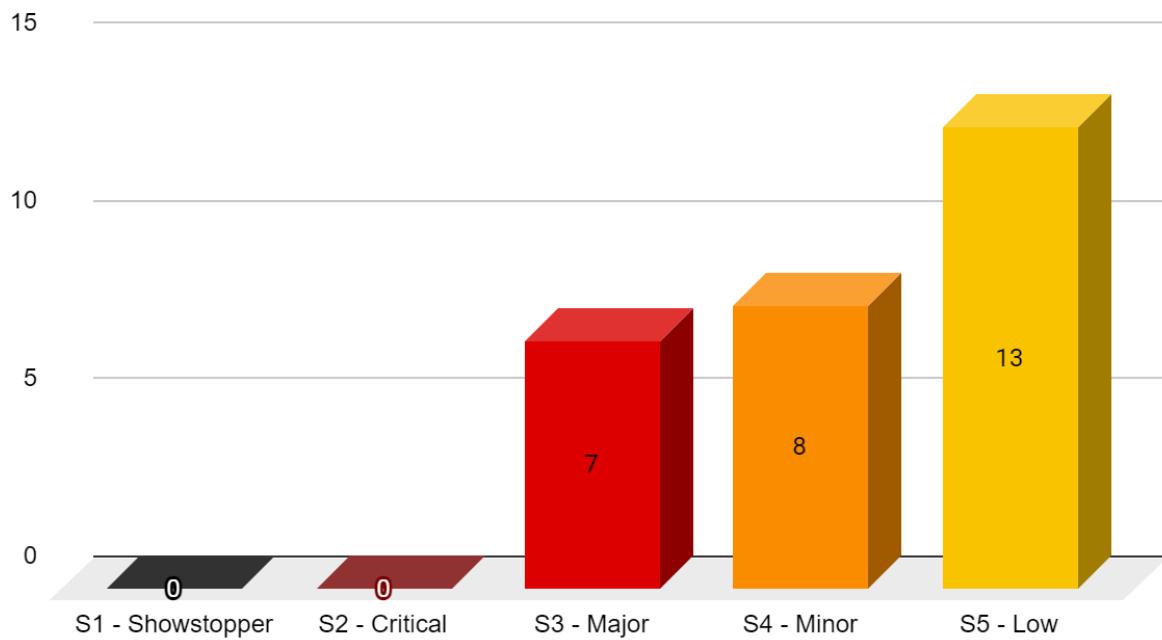

Test Results

Passed	Failed	Not Run	Total
133	28	13	174

Tests not run are tests that require successful contact form submissions to Golda. As I am not working with Golda in any capacity, I chose not to submit false forms.

The following graph shows the found bugs distribution by severity level. No bugs above S3 severity level is a good sign that the website is customer ready.

Bugs By Severity Level

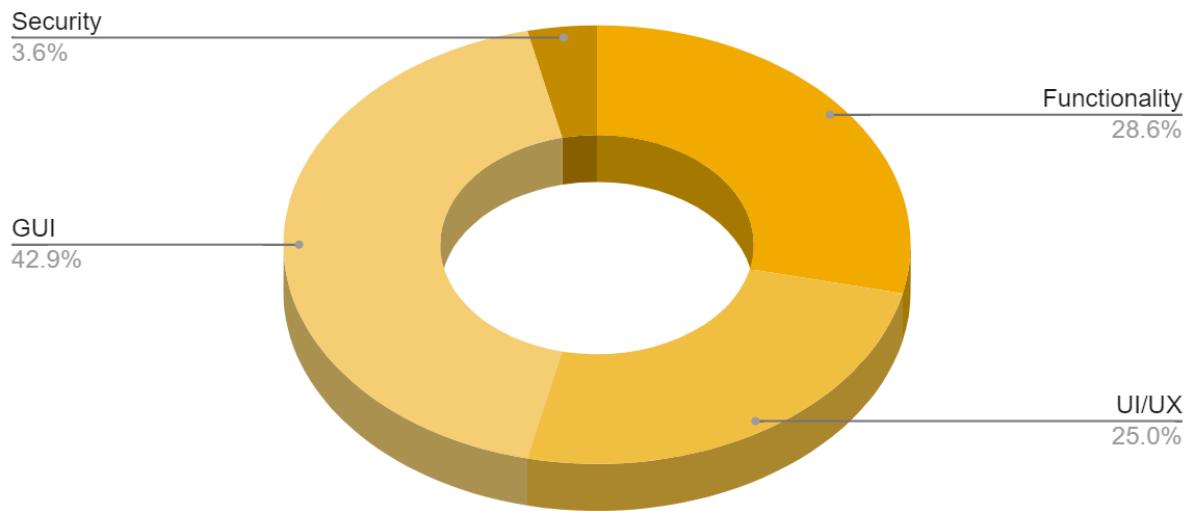

Bugs' severity level by type of bug

	Functionality	UI/UX	GUI	Security
Major	6	0	0	1
Minor	2	4	2	0
Low	0	3	10	0

This chart shows the distribution of bug types found within the testing process. A notable detail that will come up in recommendations and conclusions is the high amount of GUI type bugs, and the fact that many of them seem to relate to the website's dynamic layout.

Bug Types

Recommendations

Following my findings in this report, it is my recommendation that the Golda website stay active for users, but further testing can still uncover more issues.

I am also of the opinion that with a relatively low amount of investment in bug fixing, the website can achieve a higher level of quality. This is due to multiple 'easy fix' issues such as typos ([GOL 15-17](#)) and other trivialities (e.g. [GOL-5](#), [GOL-13](#)) as well as the fact that many of the GUI bugs reported here seem to be sourced from the same issue with the website's dynamic layout, especially when expanding/collapsing items. Therefore I believe a single bug fix to the layout problem could potentially eliminate around 50% of the GUI bugs.

Finally, S3 bugs should be fixed regardless, especially the link to an unsafe website ([GOL-4](#)).

Conclusion

While testing discovered many bugs, none are critical or worse which gives confidence in the website. Additionally since about 50% of found bugs are S5 and about 67% of bugs are GUI/UI/UX problems, it seems that functionally the website is in a customer ready state.

The testing process was extensive, however I would highlight some weak spots.

First, since I am not working with Golda I refrained from any testing that could cause Golda harm, notably I didn't send any credible contact forms to test that. Furthermore all tests were conducted on the same laptop using Windows 11, and most tests were conducted on Chrome. Last, due to time constraints not all bases were covered during this testing process, and more specific/niche test cases were not developed to accommodate that.

It is my conclusion for this testing cycle that the website is ready for further use by customers, but that bug fixing should be applied with priority on the points mentioned in the recommendations section.

Bug List

Issue key	Summary
<u>GOL-1</u>	Pressing Load More until all flavors are loaded, and then using the search bar messes with the page layout
<u>GOL-2</u>	When searching for a partial phrase and then switching from 'All Flavours' to 'Cream' or 'Sherbert' the layout hides the flavors
<u>GOL-3</u>	In stores page, expanding and un-expanding on a store causes the Instagram Posts section to snap out and back into place
<u>GOL-4</u>	Link to '507creative' website leads to an unsecure page
<u>GOL-5</u>	Hovering the cursor over the footer area of the website causes a tooltip to pop out saying a'יזור תיכון תחתון'
<u>GOL-6</u>	When transitioning from any page to the home page the header is rolled away
<u>GOL-7</u>	"לג לתוכן מרכז" button works only for Home page
<u>GOL-8</u>	When the footer is visible and you open and close the menu, the page shoots up and the footer gets stuck to the bottom of the page
<u>GOL-9</u>	When scrolling fast from the bottom of a page upward the lower part sticks to the page
<u>GOL-10</u>	Expanding job listings in Career page causes the image below to cover parts of the page
<u>GOL-11</u>	Dashed box appears unproportioned when selecting a search bar
<u>GOL-12</u>	When clicking the menu button, both a dashed white box and a dashed black line appear around the menu button
<u>GOL-13</u>	TikTok button leads to generic TikTok page instead of Golda's TikTok page
<u>GOL-14</u>	Hovering cursor over X of the pop up doesn't cause cursor to change to hand
<u>GOL-15</u>	Triple space in Accessibility Statement

<u>GOL-16</u>	Typo in Accessibility Statement
<u>GOL-17</u>	Second typo in Accessibility Statement
<u>GOL-18</u>	When submitting an invalid form with an email address without '@' only the email address is reported as invalid
<u>GOL-19</u>	Invalid names are accepted in contact form
<u>GOL-20</u>	Invalid email addresses are accepted in contact form
<u>GOL-21</u>	Referral to contact form in Career page sends user to the top of career page instead of straight to the form
<u>GOL-22</u>	Selecting and deselecting an accessibility option leaves that option still highlighted as if selected
<u>GOL-23</u>	When 3 ingredients are showcased within "best sellers" section, they are aligned to the right even though they are in english
<u>GOL-24</u>	Stores search bar doesn't work with english
<u>GOL-25</u>	Scroll bar disappears when repeatedly pressing 'Load More' in stores page
<u>GOL-26</u>	'Cookiz' ice cream lacks image
<u>GOL-27</u>	Clicking on the magnifying glass icon appears to select the search bar but does not
<u>GOL-28</u>	When using the accessibility feature 'עיצוב נגישות' cycling through images doesn't work

Bug Reports

[GOL-1] Pressing Load More until all flavors are loaded, and then using the search bar messes with the page layout

Created: 10/9/24 Updated: 10/9/24

Status: To Do

Project: Golda

Type:	Bug	Priority:	Medium
Reporter:	Omer Lev	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Environment:	Chrome Windows 11		

Attachments:

Severity: S4 - Minor

Description

Steps to Reproduce:

1. Go to <https://www.goldaglida.co.il/flavours>
2. Scroll down and click 'Load More' until all flavors are loaded
3. Scroll up to the search bar
4. Type in a search phrase that is contained in many flavors (e.g. 'e')
5. look at the layout below the search bar, scroll a bit for a better view

Expected Result:

The searched terms will appear in the appropriate place in the layout

Actual Result:

The searched terms will be obstructed and somewhat hidden by the layout of lower parts of the

page

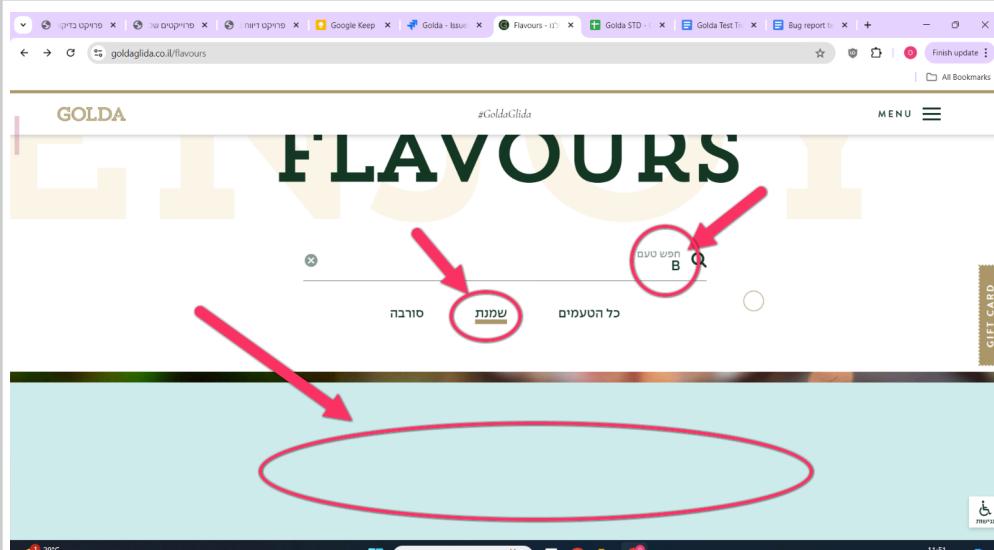

[GOL-2] When searching for a partial phrase and then switching from 'All Flavours' to 'Cream' or 'Sherbert' the layout hides the flavors

Created: 10/9/24 Updated: 10/9/24

Status:	Not Reproducible
Project:	Golda

Type:	Bug	Priority:	Medium
Reporter:	Omer Lev	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Environment:	Chrome Windows 11		

Attachments:

Severity: S4 - Minor

Description

Steps to Reproduce:

We were unable to reproduce this bug, these steps are instead a recollection of what lead to its initial finding

1. Go to <https://www.goldaglida.co.il/flavours>
2. Type 'B' in the search bar
3. Switch to 'Cream'

Expected Result:

The cream based ice creams with 'B' show up

Actual Result:

Layout hides results

[GOL-3] In stores page, expanding and un-expanding on a store causes the Instagram Posts section to snap out and back into place

Created: 10/9/24 Updated: 10/9/24

Status:	To Do
Project:	Golda

Type:	Bug	Priority:	Medium
Reporter:	Omer Lev	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Environment:	Chrome Windows 11		

Attachments:

Severity: S5 - Low

Description

Steps to Reproduce:

1. Go to <https://www.goldaglida.co.il/stores>
2. Scroll until both the Instagram posts and the stores are in view
3. Expand on one of the stores
4. Un-expand the store, and look at the Instagram posts section

Expected Result:

The Instagram posts section stays in place

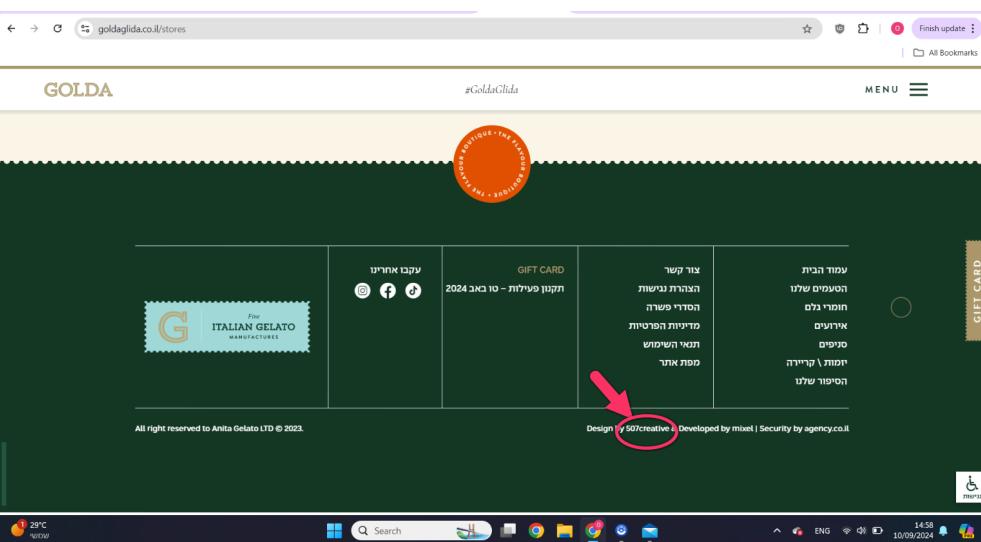

Actual Result:

The Instagram posts section snaps out of place and back into place shortly after

[GOL-4] [Link to 507creative website leads to an unsecure page](#) Created:
10/9/24 Updated: 18/9/24

Status:	To Do
Project:	Golda

Type:	Bug	Priority:	Medium
Reporter:	Omer Lev	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Environment:	Chrome Windows 11		

Attachments:	 <p>A screenshot of a web browser displaying the GoldaGilda website. The URL bar shows 'goldaglida.co.il/stores'. The page has a dark green header with the 'GOLDA' logo and navigation links. Below the header is a large orange circular button. The main content area features a dark background with white text and several small icons. At the bottom of the page, there is a footer bar with the text 'All right reserved to Anita Gelato LTD © 2023.' and '2024 באג' above it. To the right of this text, there is a red arrow pointing to the word '507creative' which is part of the footer text 'Design by 507creative Developed by mixet Security by agency.co.il'. The footer also includes links for social media and a gift card.</p>
Severity:	S3 - Major

Description

- Steps to Reproduce:**
1. Go to <https://www.goldaglida.co.il/>
 2. scroll all the way down
 3. click on '507creative'

Expected Result:
Link leads to a secure website

Actual Result:

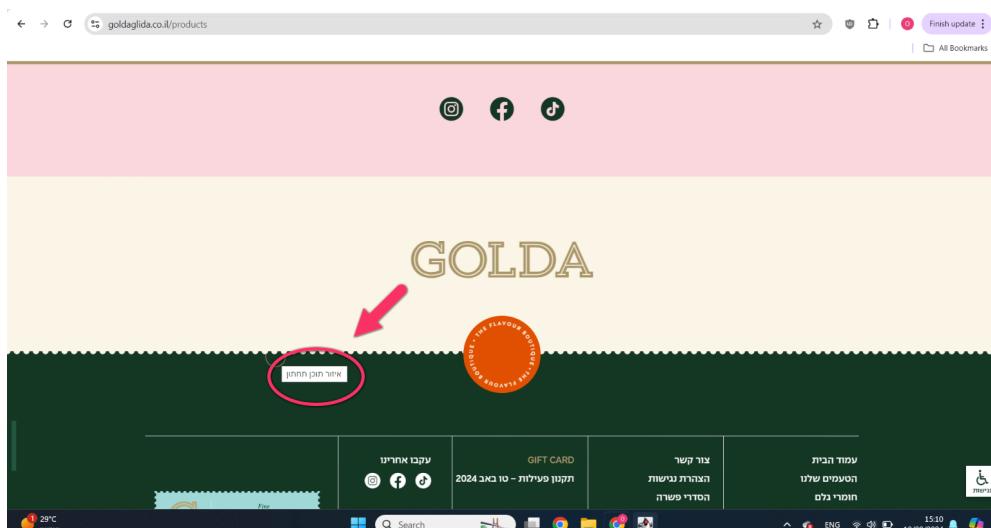

Link leads to an unsafe website

[GOL-5] Hovering the cursor over the footer area of the website**'איזור תוך תחתון'**

Created: 10/9/24 Updated: 10/9/24

Status: To Do**Project:** [Golda](#)

Type:	Bug	Priority:	Medium
Reporter:	Omer Lev	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Environment:	Chrome Windows 11		

Attachments:**Severity:** S5 - Low**Description****Steps to Reproduce:**

1. Go to <https://www.goldaglida.co.il/>

2. Scroll all the way down
3. Put your cursor anywhere in the footer area (Anywhere under the pink block of Instagram posts)
4. Don't move the cursor for about 1 second

Expected Result:

No tooltip should appear

Actual Result:

Tooltip saying 'אזרת מילוי' appears

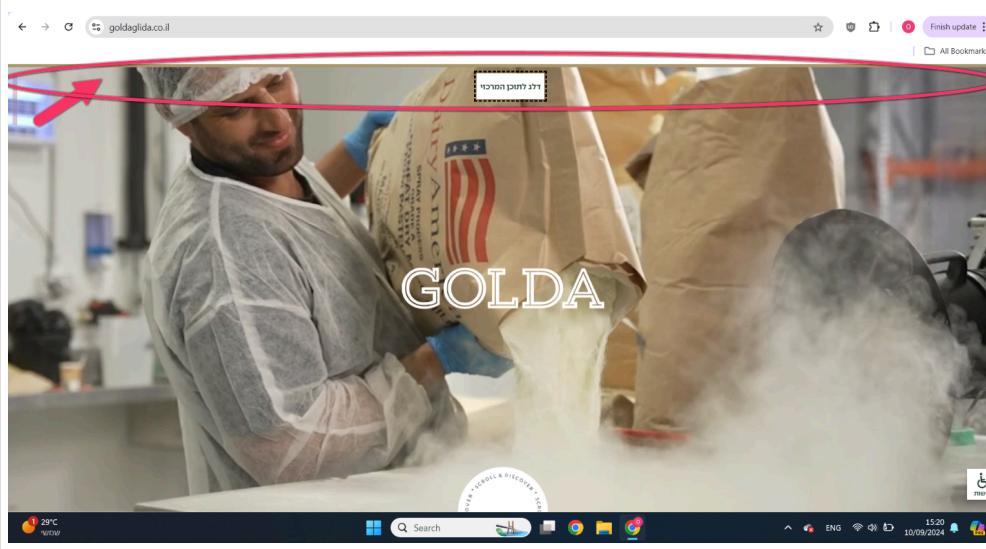

[GOL-6] When transitioning from any page to the home page the header is rolled away

Created: 10/9/24 Updated: 10/9/24

Status:	To Do
Project:	Golda

Type:	Bug	Priority:	Medium
Reporter:	Omer Lev	Assignee:	Unassigned

[GOL-24] Stores search bar doesn't work with english Created: 12/9/24 Updated: 12/9/24

Status: To Do

Project: [Golda](#)

Type:	Bug	Priority:	Medium
Reporter:	Omer Lev	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Environment:	Chrome Windows 11		

Attachments:

A screenshot of a web browser displaying the Golda website at <https://www.goldaglida.co.il/stores>. The page features a banner with the text 'Check out our Stores'. Below the banner, there is a search bar with the placeholder text 'חפשו לנו סניף או מרכז קוסמטיקה' and 'Tel Aviv' typed into it. A red arrow points from this search bar area down towards the results section. The results section shows three store locations: 'NEW OFAKIM סניף אופקים - בד"ץ בית יוספ' (circled in red), 'OR YEHUDA סניף אור יהודה - מטהרין' (partially visible), and 'GOLDA GOLDA'. The status bar at the bottom of the browser window shows the time as 15:46 and the date as 12/09/2024.

Severity:

S3 - Major

Description**Steps to Reproduce:**

1. Go to <https://www.goldaglida.co.il/stores>
2. Type 'Tel Aviv' in search bar
3. Press enter

Expected Result:

Stores in Tel Aviv appear

Actual Result:

Nothing happens to the results

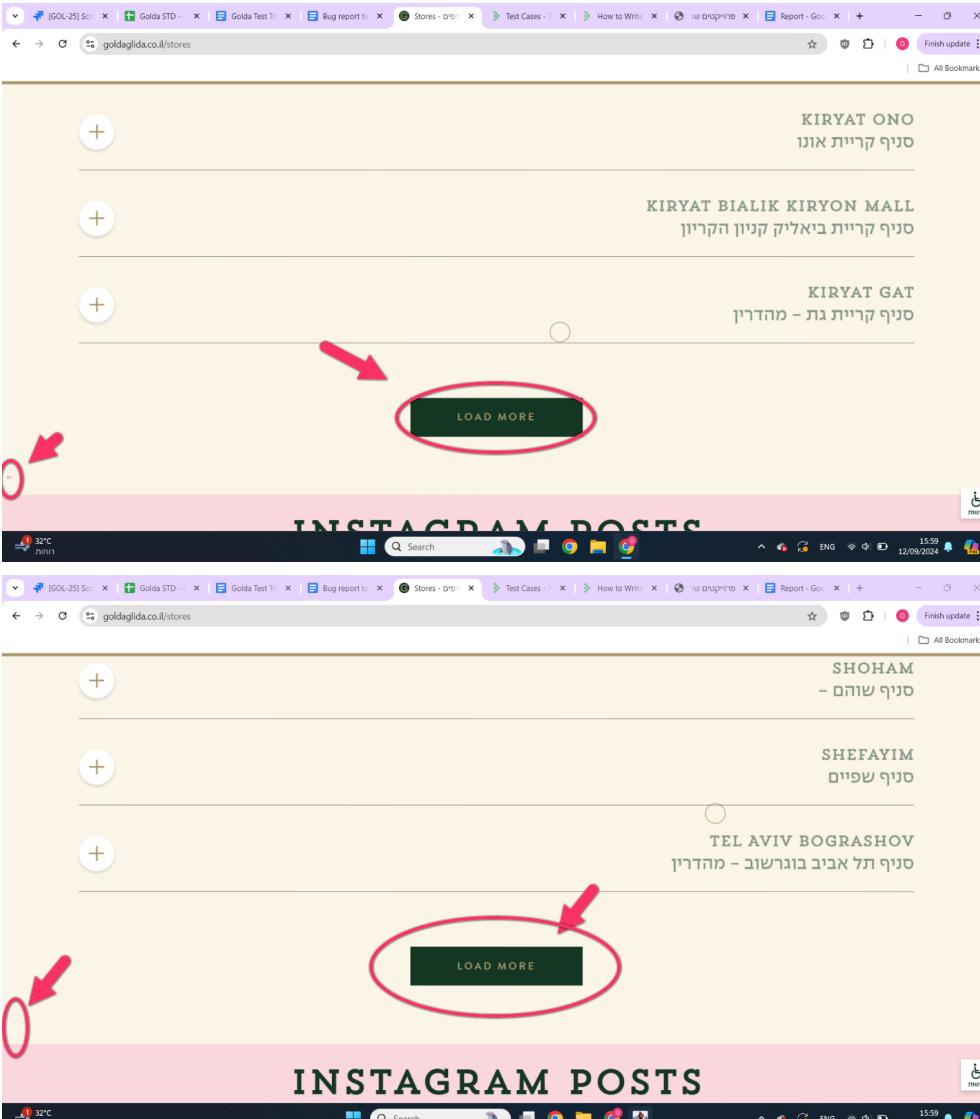

[GOL-25] Scroll bar disappears when repeatedly pressing 'Load More' in stores page Created: 12/9/24 Updated: 12/9/24**Status:** To Do**Project:** [Golda](#)**Type:** Bug**Priority:**

Actual Result:

No image appears

[GOL-27] Clicking on the magnifying glass icon appears to select the search bar but does not actually select it Created: 12/9/24 Updated: 12/9/24

Status:	To Do
Project:	Golda

Type:	Bug	Priority:	Medium
Reporter:	Omer Lev	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Environment:	Chrome Windows 11		

Attachments:

Severity:	S4 - Minor
-----------	------------

Description

Steps to Reproduce:

1. Go to <https://www.goldaglida.co.il/flavours>
2. Click on the magnifying glass icon
3. Try to type in something

Expected Result:

The search bar is selected and we can type in successfully

Actual Result:

The search bar does the animation as if it was selected, but the dashed box doesn't appear and trying to type in the search bar has no results

[GOL-28] [When using the accessibility feature 'cycling through images doesn't work](#) ערירת תנועותiot 'cycling through images doesn't work
